

AP Exceed

Soft White Winter Wheat Variety
Surpass Expectations

Highlights

- High yield potential and response to inputs
- Good seedling vigor and winter hardiness
- Medium to short height with good straw strength

Agronomics

Maturity Early
 Test Weight Very Good to Excellent
 Height Medium Short
 Straw Strength Very Good
 Head Type Awned
 Emergence Good
 Winter Hardiness Very Good
 Seeding Rate Average
 Moisture Zone > 12in

Disease and Pest Tolerance

Two-Year Trial Summary 2021-2022, Syngenta Data

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2022 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.
